

D. Remarks

- 1) The supplementary PTO1449 form listing the Elsherbini reference that the Examiner requested is submitted herewith.
- 2) Paragraphs 48 and 52 of subject Application are amended to include the reference numeral 22, referring to the rotational axis of the device. The Examiner had noted Applicant's omission of this citation in the Office Action.
- 3) The specification is amended in accord with the Examiner's suggestions in order to remove the noted inconsistencies in terminology. Specifically:
 - The feature designated with the reference numeral 28 is now described as a "cam follower", which accords with the usage of Claim 1.
 - The feature designated with the reference numeral 41 is described as an 'axial fan portion", which accords with the usage in the Claims.
 - The feature designated with the reference numeral 44 is described as a "radial compartment".
 - The feature designated with the reference numeral 52 is described as a "central inwardly projecting cylindrical portion" of the external stator.
 - The feature designated with the reference numeral 46 is referred to as an "inner opening".
 - "Intake" is now used where either "inlet" or "intake" had been used.
 - "Exhaust" is now used where "discharge" had been equivalently used.
 - The confusion between "passageway" and "channel" has been resolved by replacing all uses of the former with the latter.
- 4) The Claims are amended to correct the informalities cited by the Examiner.
